

mknix::Simulation::
staticResidue

```
graph LR; A[mknix::Simulation::staticResidue] --> B[mknix::Simulation::getDim]
```

A diagram showing a call from the `staticResidue` method of the `mknix::Simulation` class to the `getDim` method of the same class. The `staticResidue` box is shaded gray, and the `getDim` box is white. A blue arrow points from the right side of the `staticResidue` box to the left side of the `getDim` box.

mknix::Simulation::
getDim
