

mknix::GaussPoint::
shapeFunSolve

```
graph LR; A[mknix::GaussPoint::shapeFunSolve] --> B[mknix::ShapeFunction::calc];
```

A diagram showing a call from the `shapeFunSolve` method of the `mknix::GaussPoint` class to the `calc` method of the `mknix::ShapeFunction` class. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.

mknix::ShapeFunction
::calc
